★ *Simple to Use*

★ *Save Thousands Over Other Link Options!*

FINALLY AN ECONOMICAL AND EASY TO USE REMINDER AND PATIENT PAYMENT OPTION!

blink

Instant Web-based Patient Communication

On-line Patient Communications Link

Blink is a revolutionary practice management integration tool built upon a fundamental concept... Simple and Inexpensive!

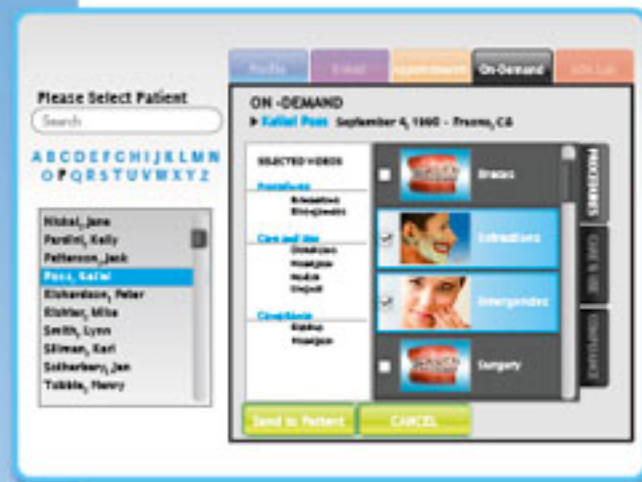

If you are paying hundreds of dollars per month for web-based linked reminders, messaging, and payments, you're paying too much.

Introducing Blink, a fully integrated web-based application that links directly from your treatment chart providing instant access to patient information and allowing you to distribute educational and compliance content on demand. **Blink** provides a cooperative integration path with several leading practice management software developers. No back door patches, or unauthorized hostile integrations.

DOCTORS ACCESS

Access patient specific information from the treatment chart with one click:

- Audit patient appointment history
- Audit email correspondence history
- Send educational videos to your patient
- Track your patient compliance history

On Demand: Distribute video content to your patients instantly or cue up a video and play it chair-side.

Auto Media: Pre-schedule and globally set your preferences so that educational videos on Procedures, Care and Use of Appliances and Patient Compliance are automatically submitted to your patients as your patient proceeds through the treatment process.

PATIENT ACCESS

On-line Account Balance and Payments: Account balances and payment options are accessed instantly.

ScreenPlay Clinical Case

Presentation Review: Patients can use Blink to access their ScreenPlay clinical case presentation from their initial patient examination.

Appointment Reminders via E-mail and Text: E-Mail and or text reminders can be activated easily and quickly. Add to the calendar feature to make this feature a snap.

Patient Preferences: You set your preferences for the automatic distribution of appointment information via email and text. You specify the frequency and intervals globally. Each patient can then change their individual preferences for frequency and intervals and even the means of reminder. Reminders are available for the patient, the primary responsible party and secondary responsible party.

Superior design, content, and management make **Blink hard to beat!**

You can have the best of all worlds with our Solutions By Design products: **Blink**, **ScreenPlay Multimedia Patient Education**, and our **custom-designed websites**. Call us and let us show you how we are the total communication solution!
